Professional Summary

Aspiring Data Analyst with hands-on experience in **SQL, Python, Excel, Power BI, and Exploratory Data Analysis (EDA)** through end-to-end analytics projects. Skilled in **data cleaning, transformation, KPI analysis, data visualization, dashboard development, and business insight generation**. Applied analytical techniques to customer retention and supply-chain datasets to identify performance trends, quantify business risks, and support data-driven recommendations.

Skills

Programming & Query Languages	:	SQL (MySQL), Python (Pandas, NumPy, Matplotlib).
Data Analytics & BI	:	Microsoft Excel, Power BI, DAX, Power Query, Data Cleaning, Exploratory Data Analysis (EDA), Dashboard Development.
Core Concepts	:	Statistics & Probability, Data Visualization, Business Intelligence, KPI Reporting.
Tools	:	Git, GitHub, VSCode.
Soft Skills	:	Communication, Analytical Thinking, Business Understanding, Problem Solving.

Projects

Customer Churn & Retention Analytics | *GitHub* SQL, Excel, Power BI

- Analyzed **10,000 customers** across segments, plans, regions, tenure, usage, payments, satisfaction, and churn reasons to identify **retention-risk patterns**.
- Cleaned and validated customer data in **Excel** by removing duplicates, handling missing values, standardizing categories, and correcting data types.
- Used **SQL joins, aggregations, CTEs, and window functions** to analyze churn, revenue, payment behavior, satisfaction, and subscription performance.
- Built an interactive **Power BI dashboard** with KPI measures and filters to analyze customer behavior and revealed a **28.75% churn rate**.
- Quantified customer attrition impact by identifying **2,875 churned customers** and approximately **₹4.62M monthly revenue at risk**.

BharatMart Supply Chain Performance & Delay Analytics | *GitHub* SQL, Excel, Power BI

- Analyzed orders, procurement, inventory, suppliers, warehouses, shipments, and deliveries to identify **fulfillment and operational bottlenecks**.
- Cleaned and validated supply-chain data in **Excel** by removing duplicates, handling missing values, standardizing categories, and validating relationships.
- Calculated supply-chain KPIs across **10,000 orders** worth approximately **₹735.79M to evaluate operational and fulfillment performance**.
- Built an interactive **Power BI dashboard** with KPI measures and filters across regions, priorities, sales channels, ABC classes, and city tiers.
- Evaluated delivery performance and identified **4,276 delayed shipments, 34.96% OTIF, 57.24% on-time delivery, and 90.23% fill rate**.
- Identified supplier and inventory risks through **57.22% supplier on-time performance** and approximately **₹1.194M backordered units**.

Education

RGUKT RK-Valley University 2022 - 2026
Bachelor of Computer Science & Engineering *CGPA : 7.65*

RGUKT RK-Valley University 2022 - 2026
PUC (Maths, Physics, Chemistry) *CGPA : 7.6*

Hobbies

Filmmaking — Screenwriting — Cooking — Fitness
